## 1. Facing Unexpected Downtime? You're Not Alone.

In the fast-paced world of production and operations, every minute of unplanned downtime feels like money slipping through your fingers. Your team are constantly racing against the clock, reacting to one urgent breakdown after another, which not only disrupts your production schedule, but also strains your team and your budget.

## 2. The Hidden Costs of Mismanaged Resources

Perhaps you've observed instances where tasks are delayed because tools or parts aren't available when needed, or maintenance personnel are waiting on one another or the operations team to complete tasks. This mismanagement not only wastes valuable artisan time, but also escalates downtime and operational costs unnecessarily.

## 3. The Consequences of a Reactive Maintenance Culture

A reactive maintenance approach may seem like the only way to handle issues as they arise, but it's a costly and inefficient strategy. It leads to frequent breakdowns, increased wear and tear on equipment and ultimately, a shortens the lifespan of your valuable assets.

## 4. Transform Your Maintenance Management with a Qualified Planner

Imagine a scenario where your maintenance operations run with clockwork precision:

- **Increased Tool Time and Productivity:** With a professional Maintenance Planner on your team, scheduled maintenance tasks are prepared in advance, ensuring that everything needed, from personnel to parts, are ready when required. This optimisation drastically cuts down on waiting and preparation time, making use of your artisans to do what you pay them to do: improving the condition of your machinery.
- **Proactive Maintenance Strategies:** Instead of putting out fires, your Maintenance team will implement proactive maintenance strategies. These strategies ensure regular preventive maintenance, reducing the frequency and severity of breakdowns and extending the lifespan of your equipment.
- **Strategic Asset Management:** Align maintenance activities with your business goals efficiently, ensuring that every decision made maximises asset utilisation and lifecycle cost, which in turn supports your company's overall productivity and profitability.

## 5. Why Terotechnica?

Since the early 1990s, Terotechnica has set the standard in Maintenance and Asset Management training. With more than 10,000 learners trained from over 400 companies across Africa and the Middle East, we are your trusted partner in education. We're accredited by the QCTO, are in the process of being accredited by the Council for Higher Education (CHE) and are rated a Premier International Institution by the UK based accreditation body, ASIC.

## 6. Tailored Curriculum for Real-World Application

Our curriculum covers essential skills for enhancing maintenance department effectiveness. If you'd like to see the course content, just click on the course name.

- **C301: Maintenance Planning & Scheduling**
- **C303: Computerised Maintenance Management Systems**
- **S803: Root Cause Failure Analysis**

Our courses are designed not just to educate, but to transform. Learners engage in practical, real-world case studies in class and apply these skills at work as part of their assessment. Actual work experience is also part of their training. This hands-on approach ensures that by the time they complete their qualification, they are not just certified, but truly capable.

## 7. Benefits for the Learner:

- **National Recognition:** Graduates are listed on the QCTO's national database, affirming the validity of their qualification across South Africa.
- **International Recognition:** Successful completion allows the learner to apply to the South African Asset Management Association (SAAMA) to attain the professional designation of Maintenance Planner. This designation is recognised internationally through the World Partners in Asset Management (WPiAM).

## 8. Price & Tax Incentives

The cost of the qualification is R53 998 per learner. Investing in this training qualifies your company for tax rebates of up to R30 779, meaning that for all the benefits, this investment will only cost your company R23 218.

## 9. Partner with Us to Revitalise Your Operations

We invite you to enhance your team's capabilities. Enrol your employees in Terotechnica's Occupational Certificate in Maintenance Planning today and let us help you run your operations like a well oiled machine.
